## Volume 27

**MODEL SYSTEMS**
The definitions of metabolic control analysis revisited
S. Schuster and R. Heinrich (Bordeaux, France; Berlin, Germany) 1
The cell division cycle: a physiologically plausible dynamic model can exhibit chaotic solutions
D. Lloyd, A.L. Lloyd and L.F. Olsen (Cardiff, UK; Odense, Denmark) 17
Effects of afterhyperpolarization on neuronal firing
P. Lánský, M. Musila and C.E. Smith (Prague, Czechoslovakia; Raleigh, NC) 25

**SYMBIOSES AND PHYLOGENY**
Biodiversity: molecular biological domains, symbiosis and kingdom origins
L. Margulis (Amherst, MA) 39
Phylogenetic consequences of symbioses: Eukarya and Eubacteria are not monophyletic taxa
D.P. Mindell (Cincinnati, OH) 53

**EVOLUTIONARY THEORY**
The Uncertainty Principle as an evolutionary engine
K. Matsuno (Nagaoka, Japan) 63

**GENETIC CODE**
Periodical changes of amino acid reactivity within the genetic code
I.Z. Siemion and P. Stefanowicz (Wroclaw, Poland) 77

**COMPUTING/ANALYSIS**
Neural computing in discovering RNA interactions
Y. Takefuji, D. Ben-Alon and A. Zaritsky (Cleveland, OH; Be'er-Sheva, Israel) 85

**MODEL SYSTEMS**
Enzymes as molecular automata: a reflection on some numerical and philosophical aspects of the hypothesis
P.C. Marijuán and J. Westley (Barcelona, Spain; Chicago, IL) 97
The antigen-antibody interaction algebraically interpreted as a relational process
A.N. Zaretzky and C.A. Leguizamón (Buenos Aires, Argentina) 115

**EVOLUTIONARY THEORY**
M.V. Volkenstein, evolutionary thinking and the structure of fitness landscapes
M. Conrad and W. Ebeling (Detroit, MI; Berlin, FRG) 125

**MODEL SYSTEMS**
Homochirality and long-range transfer in biological systems
O.I. Fisun and A.V. Savin (Moscow, Russia) 129

Neural modeling with dynamically adjustable threshold and refractory period
Q. Gan and Y. Wei (Nanjing, P.R. of China) 137
Structured Biological Modelling: a method for the analysis and simulation of biological systems applied to oscillatory intracellular calcium waves
M. Kraus, P. Lais and B. Wolf (Freiburg and Bad Nauheim, FRG) 145
Global stability of prey-predator systems with predatory switching
D. Mukherjee and A.B. Roy (Calcutta, India) 171

**Special Issue**

**MOLECULAR ELECTRONICS AND BIOCOMPUTING**
Molecular computing for edge-enhanced laser imaging
H. Szu, A. Tate, D. Cullin, M. Walch, D. Demske, J. Garcia, S. Phuvan, N. Caviris (Silver Springs, MD; Dahlgren, VA) 179
Do biomolecules process information differently than synthetic organic molecules?
F.T. Hong (Detroit, MI) 189
Purple membrane multilayers: detailed structure and photoelectric characteristics of bacteriorhodopsin
A.V. Maximychev, S.K. Chamorovsky, V.I. Panov, E.A. Fedorov and N.G. Rambidi (Moscow, Russia) 195
Bacteriorhodopsin: a picosecond optoelectric signal transducer
G.I. Groma, G. Szabó, Gy. Váró, F. Ráksi and L. Keszthelyi (Szeged, Hungary) 201
Biosensors and enzyme immobilized electrodes
R.S. Phadke (Bombay, India) 203
Molecules as electronic components?
R.W. Munn (Manchester, UK) 207
Molecular optical memories and switches based on photochromic dihydropyridines
S. Nešpůrek (Prague, Czechoslovakia) 213
Towards a biomolecular computer
N.G. Rambidi (Moscow, Russia) 219
The seed germination model of enzyme catalysis
M. Conrad (Detroit, MI) 223
Semantic commitments as a mode of non-programmable computation in the brain
K. Matsuno (Nagaoka, Japan) 235
